

Job/Role Description

Sector Leader Environmental - MPAMOT

South Africa

1. Introduction

MPAMOT is a multisector consultancy providing engineering, management, and development services on projects. With over 200 of the best people working on a diverse range of challenges, we're helping our clients deliver sustainable infrastructure and development solutions. We have a collegiate and collaborative culture which values equality and diversity, and we take proactive steps to create an inclusive workplace.

MPAMOT's energy environment and social team is at the leading edge of delivering environmental services for energy projects internationally.

We're looking for a senior or principal environmental consultant to join and lead our team in South Africa.

2. Role Description

The focus of the role will be:

- Servicing existing clients in South Africa which include banks and sponsors, renewables companies, multinational development agencies,
- Acting as Environmental Sector leader in our interface in the market
- Leading and managing the enviro team and interfacing with the Renewables Team Leaders,
- Being part of the broader management team in the firm and influencing strategy, growing the business as agreed with the COO- energy, advisory and shared services
- Environmental assessment for energy projects in South Africa
- Collaborating with MPAMOT personnel as well as collaborating partners particularly in Europe, Africa and Latin America. MPAMOT and partners work on some of the most significant generation projects in the world, including solar, hydro, wind, and thermal generation technologies.

Key elements of the job will include:

- environmental impact assessment
- environmental due diligence
- environmental monitoring
- environmental management
- managing projects
- managing clients
- managing sub-consultants
- preparing proposals
- meeting budget targets
- experience/knowledge with SA permits for power generation plants
- travel

3. Candidate specification:

The following specifications apply:

- fluent in English
- degree and Masters qualified in an environmental subject
- experienced in the coordination and delivery of environmental work by multi-disciplinary teams. Including ESIA and due diligence for major infrastructure energy projects
- a thorough understanding and experience of applying environmental safeguards of international finance institutions such as the World Bank Group, the European Bank for Reconstruction and Development and European Investment Bank, among others;
- able to review complex documents, summaries and present the key issues in a clear and concise way
- ability to travel
- strong interpersonal, communication and writing skills
- aptitude in identification, progression, delivery and success in tendering for new project opportunities
- able to work within a team and motivate others to deliver to high standards
- able to meet challenging budgets and timescales
- membership of a relevant professional institute.

You'd be part of a local organisation with links to a global multidisciplinary team; working alongside some of the best environmental specialists, social specialists and engineers in the industry.

4. Desirable:

It is desirable that the candidate profile aligns to the following:

- a competent standard in an environmental specialisation and a broader awareness of other environmental or social disciplines
- experience of options appraisals and iterative design processes
- basic understanding of the technical aspects of major infrastructure projects (such as energy generation technologies).

5. Salary:

To be negotiated: Competitive salary plus benefits

6. Location:

South Africa – Johannesburg, Cape Town
